

NEW PRODUCT SHOWCASE

TVONE CORIOMASTER APP

tvONE has launched the CORIOmaster app, a control tool for CORIOmaster video wall processing systems. The CORIOmaster app is a free application for smartphones and tablets that extends the control of CORIOmaster video walls onto mobile platforms. Users can execute all simple control functions with ease through the CORIOmaster app, including viewing all canvases, viewing “source-to-window” assignments, activating presets, switching inputs, and assigning fresh sources to windows. Additionally, more sophisticated control is possible by sending single or command chains using API commands set. The app also provides a secure wireless control platform, allowing users to control CORIOmaster wirelessly on an internal Wi-Fi network. Additionally, the app gives users the ability to control CORIOmaster without having to launch the CORIOmaster design software, CORIOgrapher. The new application works with Apple (iOS version 9 and above) and Android (v5.0 [Lollipop] and above) devices.

PEERLESS-AV SMART CITY KIOSK

Peerless-AV's Smart City Kiosk (KOP2549-XHB, KOP2555-XHB) is designed to be modern, approachable, practical, and endure the rigors of everyday use when unattended. The new all weather-rated solution is ideal for sharing community information, travel, and weather details, as well as wayfinding, advertising, entertainment, and more.

The Smart City Kiosk includes an Xtreme High Bright Outdoor Display with full HD1080p resolution for a bright crisp picture, even in direct sunlight. In addition, an optional 10-point IR touch overlay makes the kiosk interactive for all users.

Featuring a curved, modular design that seamlessly blends into any city or town set-up, the Smart City Kiosk offers quick access to the display for maintenance without disturbing any adjacent units. Plus, installation is easy, without the need for cranes or forklifts. Additional features include a minimalistic design, fully sealed display that does not require air conditioners, fans or cool-

ing, sealed media storage, customizable paint and design options, and integration services offered by Peerless-AV.

Available in 49 in., 55 in., and soon 65 in., the Smart City Kiosk can withstand winds up to 140 mph, making it useable in any city or town for a range of applications, such as retail, government, corporate, hospitality, stadium, and university settings.

The new kiosk is available now through Peerless-AV direct sales representatives and authorized distribution networks. To learn more about the Smart City Kiosk, visit <https://www.peerless-av.com/en-us/professional/products/kop25-xhb>.

MATROX HIGH DENSITY 12G SDI I/O CARDS

Matrox Video has added the X.mio5 12G, a multi-channel SDI I/O card with onboard video processing, and the DSX LE5 12G, a multi-channel SDI I/O card to its portfolio. The developer cards offer reconfigurable, high-density 12G/3G SDI connectivity, enabling OEMs to build advanced broadcast media and entertainment solutions for multi-channel 4K and HDR requirements.

The Matrox X.mio5 12G card provides multi-channel 12G/3G SDI I/O for 4K workflows, featuring four 12G inputs, four 12G outputs, and four 3G reconfigurable I/O, or 12 completely reconfigurable 3G I/Os. The Matrox X.mio5 12G card also features on-board multi-channel HDR conversions along with motion adaptive de-interlacing, pristine scaling, and powerful compositing engines.

The Matrox DSX LE5 12G card offers the same high-density I/O support for systems requiring multi-channel 12G/3G SDI connectivity only. Both of the 12G cards are supported by the Matrox DSX SDK, ensuring rapid application development and system deployment of next-generation broadcast graphics systems, channel-in-a-box platforms, and capture/payout video servers. Matrox X.mio5 12G and Matrox DSX LE5 12G cards will be available Q1 2019. Developers may obtain more information by e-mailing video_oem.info@matrox.com.

COMPREHENSIVE CHE-HDBT2020 PRO AV/IT HDBASET EXTENDER KIT

Comprehensive Connectivity Company's new CHE-HDBT2020 - Pro AV/IT 4K 18G HDBaseT Extender TX/RX Kit is ideal for extending UHD audio, video and ethernet up to 330 feet. The kit supports 18G, Ultra HD, 4K60, 4:4:4 Color Space,
