Peerless-AV™ Announces Three New Flat Panel Kiosk Enclosures – Easy-to-Assemble, Secure, Sleek Design Ideal for High-Traffic Areas

Portrait and Landscape Kiosk Enclosures Present Modern Ultra-Thin Design – Offers Enhanced Security Features for 40, 46 and 55-Inch Displays

Calgary, Canada (September 9, 2012) – Peerless-AV, the leader in innovative audio and video solutions, has announced the launch of three new portrait and landscape-oriented flat panel kiosk enclosures. The products will be on display September 9-12 at the ACI-NA 21st Annual Conference in Calgary, Canada at Peerless-AV's booth #400.

The company features two landscape positioned kiosks, the KL540-S and the KL546-S, which are both silver in color and designed for 40-inch and 46-inch ultra-thin televisions, respectively. Also offered is the KP555-S, a portrait oriented silver kiosk for 55-inch displays.

Ideal for a variety of airport applications including FIDS/GIDS/BIDS, wayfinding, retail merchandising, and advertising, the KL540-S and KL546-S landscape enclosures are designed to blend with the surrounding environment and complement the airport's branding efforts. Simple to install, the landscape kiosk enclosures feature a hinged display mounting arm offering ease of installation and ease of access to the display should removal be necessary. Adjustments to the display are made using eight tool-less adjustment points, allowing facility workers to quickly line up the monitor.

The KP555-S portrait kiosk features a slim profile designed to present maximum screen space. It can accommodate several aesthetic enhancements including vinyl wraps and acrylic trim, in order to perfectly fit with the venue's unique look and feel. A cam-locked rear door ensures the display is secure from theft or tampering, and provides easy access to internal components and a media player.

All three new products can be fitted with optional fan cooling systems, which can greatly expand the life of the electronics by effectively dissipating heat. A depth adjustability feature ensures the kiosks are compatible with a variety of displays that are built to varying dimensions.

"These kiosks feature a clean and modern design, which fits prevalent usage of today's ultra-thin displays," said Peerless-AV Director of Business Development, Jeff Blankensop. "Our new kiosks provide a secure and stylish platform that enhances the customer's multimedia content. We put a lot of thought into these products, including features such as cam locked doors and optional cooling fans and speakers. The stand is exceedingly easy to assemble and adjust, and can be up and running within minutes, giving customers an easy solution for reaching large audiences."
