

Peerless-AV® to Showcase Digital Signage Solutions at ACI-NA Booth 114
Solutions highlight the importance of digital signage in airport transportation

ATLANTA – September 8, 2014 – Peerless-AV®, the leader in digital signage solutions, is pleased to announce they will be exhibiting several digital signage solutions at this year's Airport Council International – North America ([ACI-NA](#)) Annual Conference & Exhibition at Booth 114.

At the expo, Peerless-AV will be showcasing digital signage solutions and the benefits of utilizing digital signage in airport transportation. In an effort to enhance commercial airports, there is a need for digital signage to keep travelers informed of flight statuses and allow them to easily check on their baggage. When choosing a digital signage solution, there are a variety of solutions to consider, such as outdoor displays, kiosk enclosures, and video walls.

On display at Booth 114, Peerless-AV will be showcasing a 2x2 Video Wall using a combination of digital signage solutions in order to create the video wall.

Solutions will include:

- *Universal 2x2 Video Wall Mounting Kit (DS-VW660-2X2):* Creating a 2x2 video wall is simple and cost effective with the Peerless-AV DS-VW660-2X2 video wall kit. The single wall frame design is quickly installed and built in horizontal adjustment makes aligning displays easy. With a thin design, ADA compliance is a non-issue with displays measuring 1.71" deep or less.
- *Video Wall Conversion Kit (ACC-DS-VWS2X2):* This kit allows users to create a seamless 2x2 video wall with existing Peerless-AV products. To attach the 2x2 video wall mount, simply attach clamps to two FPZ-600 stands. Clamps can be positioned anywhere along the stand poles for proper height setting.
- *(2) Flat Panel Display Stands (FPZ-600):* Flat Panel Display stands offer a safe and secure solution for displaying digital content in public areas such as conference rooms, airports, and convention centers. This versatile stand enables single display, two displays back-to-back, two displays in portrait orientation, an even up to four displays in landscape or portrait orientation. The stand offers integrated security fasteners to lock the display in place, ultimately eliminating theft. All wires and cables are completely hidden with internal cable management for a professional, clean look.

Peerless-AV will also be showcasing the Landscape Kiosk Enclosure (KIL540). This enclosure was designed to best support an ultra-thin display. It features eight-way tool-less adjustment for ease in aligning the display and a hinged top frame that allows for easy maintenance and enhanced security. The KIL540 supports a wide

range of aesthetic options, including multiple colors, vinyl wraps, etc. to best match environment or promote brand strategy.

In addition to exhibiting at the show, Peerless-AV's Kevin McDonald will be presenting on the topic of "The Importance of Digital Signage in Airport Transportation" on Monday, September 8 from 1:05-1:25 PM at the Solution Showcase Theater #1. McDonald will be discussing the various options that airports have when choosing the best solution for their needs, including outdoor displays, kiosk enclosures, and video walls. He will discuss the benefits of digital signage solutions and what airports should look for when choosing a digital signage solution. He will also provide examples of successful digital signage installations in airports across the globe.
