

**Peerless-AV Introduces Industry's First Special Purpose Video Wall Mount**  
*The DS-VWM770 helps create impactful, seamless video wall displays for retailers, hospitals and healthcare facilities, hotels, airports, entertainment venues and more*

**Aurora, IL, December 17, 2013:** Peerless-AV, a leader in digital signage video wall mounts, is excited to introduce the audiovisual industry's first universal special purpose video wall mount, the DS-VWM770.

Designed for endless possibilities, the DS-VWM770 allows for video displays between 46" to 70" to be positioned at virtually every angle. Displays securely attach to the mount in 15° increments ranging from 0° to 360°, providing repeatability and adjustability from display to display.

While on the [universal wall mount](#), displays can be easily accessed and serviced with the option to extend the mount from the wall and rotate the display at up to 90° of swivel. Other features of the DS-VWM770 include a security lock out screw to eliminate pull out ability and ten points of micro adjustment, which delivers the fine-tuning necessary to create a seamless video wall appearance.

"Designers and companies are continuously looking for innovative ways to display digital signage," said Brian McClimans, Managing Director of Business Development, Peerless-AV. "As the first universal special purpose video wall mount, the DS-VWM770 provides the industry with the creativity, flexibility, and accessibility to take video walls to the next level."

With high impact design as a key focus, the DS-VWM770 is particularly well suited for retail stores, hospitals, hotels, lobbies, ballparks, and airports.

The DS-VWM770 is currently available through Peerless-AV direct sales representatives and authorized distribution network.
