## **Peerless-AV™ Ultra Slim Flat Panel Mounts Transform Ultra-Thin LED TVs into Gallery Show Pieces with Ultra Slim Form and Remarkable Function**

*World's Thinnest LED TV Mounts Designed and Made in the USA to be Featured at HITEC 2012; Universal Flat, Tilt and Articulating Models Ensure Optimum Viewing Pleasure for Ultra-Thin LED TVs with Style*

**HITEC 2012 BALTIMORE AND CHICAGO** – [Peerless-AV](#), the leader in innovative audio and video solutions made in the USA, announced today that it will feature its exclusive new Ultra Slim collection of ultra thin flat panel LED TV mounts at HITEC 2012 June 25-28 in Baltimore, Maryland. The world's thinnest LED TV wall mounts on the market, **Peerless-AV's** Ultra Slim mounts turn today's ultra-thin LED TVs into gallery-quality works of art with an exceptionally flat profile that displays a TV just 1/3-inch from the wall. So thin that the mount practically disappears on the wall, the easy-to-install Ultra Slim series also features tilt and articulating models for optimum viewing pleasure.

“Thin is definitely in – hotels want the sleekest, lowest profile look on the wall as possible, and they want the new LED TVs that make a statement, but don't overwhelm a room,” said Brian McClimans, Managing Director of Business Development, Peerless-AV. “And, with the new ultra-thin LED TVs, they need a mount that completes the ultra-thin look. Our Ultra Slim mounts deliver that ultra-modern, super-thin look while providing an extraordinary viewing experience for guests.”

### **No Other Mount Comes Closer**

As the world's thinnest flat wall mounts, the Ultra Slim collection features three models that securely hold any ultra-thin LED TV – with screen sizes from 23 inches to 65 inches – just 1/3-inch from the wall, making the mount virtually undetectable and the TV unobtrusive. Up to eight inches of horizontal adjustability makes for simple and effortless alignment of the set, providing the perfect TV viewing position.

### **A New Tilt on Ingenuity**

The new Ultra Slim collection also features the world's thinnest tilt mounts that provide a close-to-the-wall fit – about 2/3-inch off the wall – for 22- to 60-inch TVs with tilt adjustment options to enhance viewing and ease installation. Where other mounts use rudimentary support stands that swing out to hold the TV off the wall, Peerless-AV's innovative patent-pending hinge design gives the Ultra Slim tilt collection an impeccable tilt range of more than 17 degrees, making it easier than ever to achieve the perfect viewing angle. To aide in installation, a 5-1/2 inches of off-the-wall extension provides plenty of room between the wall and TV to use both hands for wiring and cable management.

### **A Full Spectrum of Ultra-Slim Articulation**

Peerless-AV's Ultra Slim collection offers the world's only ultra-slim articulating mounts for ultra-thin LED TVs that combine a low-profile form factor with full-motion articulation to deliver contemporary style and maximum functionality. Starting from just one inch slim in the closed position, the Ultra Slim mounts extend out a full 29 inches off the wall and feature one-touch™ tilting and fluid any-angle movement. When fully extended, the Ultra Slim articulating mounts allow an ultra-thin 55-inch LED TV to be turned a full 90 degrees for the perfect viewing angle from anywhere in the guest room, or even from another adjacent room. With this full range of motion, the TV can even be positioned around or in a corner.

### **Universal Compatibility for Simple Installation**

The Ultra Slim collection's ultra lightweight and universal compatibility make installation quick and easy. A simple hook-on design features two flat brackets that fasten the TV to the wall plate in one simple step. Tilt models feature five inches of extension from the wall, making it easy to connect the cables; Articulating models feature an open wall plate design for ease of installation.
