

Peerless-AV Introduces Full-Service Quick Release Video Wall Mounts
The DS-VW765-LQR/PQR and DS-VW795-QR video wall mounts feature easy-to-install custom wall plate spacers

LAS VEGAS — February 12, 2014 — Peerless-AV, a leader in digital signage video wall mounts, is happy to announce the release of three new full-service quick release video wall mounts – the DS-VW765-LQR (for landscape orientation), DS-VW765-PQR (for portrait orientation), and the DS-VW795QR (for large format displays).

Designed for quick service access in recessed video wall applications, the DS-VW765-LQR/PQR and DS-VW795-QR provide the versatility demanded by integrators. Equipped with a simple push release feature, these video [wall mounts](#) are suitable for a wide range of vertical markets, from high traffic public areas in transportation and leisure settings to impactful displays in retail and corporate applications. The DS-VW795-QR, in particular, is ideal for large video wall designs as it supports 65" to 95" displays weighing up to 225 pounds.

“By working in collaboration with installers, system integrators, customers and dealers, Peerless-AV has developed a mount that directly addresses the specific requirements of all these parties,” said Brian McClimans, Vice President, Global Business Development, Peerless-AV. “This is the most innovative and versatile solution available and builds on the success of our existing award winning video wall mounts range.”

Easy to use and install

The DS-VW765-LQR/PQR and DS-VW795-QR feature a simple installation process with the use of custom wall plate spacers – eliminating the guesswork and on-site installation calculations and measurement. With the quick-release functionality, users have the ability to articulate the display from the wall by gently pressing on the front of the display. The carriage extension force can be adjusted to accommodate the weight of the display, allowing the quick release mechanism to activate with the gentle force. To prevent unintentional pop-outs, the quick-release feature can be disabled using a locking screw.

Modular mount for unlimited video wall display configurations

The DS-VW765-LQR/PQR and DS-VW795-QR offer endless possibilities when it comes to video wall design. Featuring tool-less micro adjustment at eight points, the mounts can overcome uneven walls to create a seamless video wall display. The [video wall mounts](#) also include integrated cable management tie-backs, making display-to-display cabling simple. To provide complete customization and allow

users to mix SKUs, the DS-VW765-LQR/PQR are equal in depth to Peerless-AV's similar existing models, including the award-winning, patented DS-VW765-LAND/POR, which the DS-VW765-LQR/PQR are based off of, as well as the DS-VW665.

The DS-VW765-LQR/PQR will be available in March 2014 and the DS-VW795-QR will be available in April 2014 through Peerless-AV direct sales representatives and authorized distribution network.

The DS-VW765-LQR/PQR and DS-VW795-QR will be showcased at the Digital Signage Expo (DSE) from February 12-13, 2014 at the Peerless-AV Booth# 905.
